

Int. Appl. No. : PCT/EP2005/001813  
Int. Filing Date : February 22, 2005

## AMENDMENTS TO THE SPECIFICATION

**Please add the following header and paragraph immediately after the Title of the Invention:**

### Related Applications

This application is a U.S. National Phase of International application No.: PCT/EP2005/001813, filed February 22, 2005, designating the U.S. and published in English on October 13, 2005 as WO 2005/095570, which claims the benefit of European application No.: 04004769.8, filed March 2, 2004.

**Please add the following header on page 1, immediately above line 3:**

### Field of the Invention

**Please add the following header on page 1, immediately above line 10:**

### Background of the Invention

**Please add the following header on page 2, immediately after line 5:**

### Summary of the Invention

**Please add the following header and paragraphs on page 2, immediately after line 26:**

### Brief Description of the Drawings

Figure 1 shows the test results of Example 1, test 1 (silver protection).

Figure 2 (A and B) shows the test results of Example 1, test 2 (cleaning performance). The graphical parameters of a dishwashing cleaning composition comprising benzotriazole according to the prior art and a dishwashing cleaning composition comprising manganese proteinate according to the present invention which resulted from a Fresenius-like ADCC performance test are shown and compared in Figures 2A and B.

Figure 3 shows the test results of Example 1, test 3 (bleaching performance). The results of the lower concentrations (0.3% MnSO<sub>4</sub> x 1 aq., 0.6% manganese proteinate) of application are shown in Figure 3.1-1 and the higher concentrations (2.5 MnSO<sub>4</sub> x 1 aq., 5% manganese proteinate) of application are shown in Figure 3.1-2.

**Please add the following header on page 2, immediately above line 28:**

### Detailed Description of the Preferred Embodiment
